**Physician Obligation & Human Rights**

I agree that:

1. Doctors should not discriminate against patients.
2. Priority of compassionate care
3. Doctors should not limit access in remote areas.

Please remove the requirement of physicians to perform any or all treatment requested by the patient where taking of life is involved including the need to refer to taking of life. An example would a patient requesting assisted suicide. Reference: ‘Physician Obligation & Human Rights.’

This is the first letter I have written to government where I feel they are doing something very wrong. You’re allowing the taking of lives, for what I believe is the first time in recent history and war is not involved. This is not WAR.
