Re: The intended policy, *Professional Obligations and Human Rights*

Dear Committee Members,

Aristotle rightly called us “moral animals” and by removing the word, moral, we are left “animals.” Obviously the intention of Section 8, 10 and 11 that imposes a mindless co-operation of physicians with an “anything goes” future for medical procedures is a gross violation, not only of doctors’ moral rights, but of intelligence and thus humanity, generally.

This is but one more application of the operative atheism of Canadian society, the results of which objectify and thus remove any dignity from the human landscape. My father, a veteran of WW II felt betrayed as he risked his life and surrendered his youth to defend values that are legally opposed in Canada, the killing of the unwanted, stands out as the worst.

The removal of intelligence and the imposition of a dictatorship spells the demise of any democracy and what will we have then? Certainly not the Utopia that is proposed by Section 8, 10 and 11.
