Conscience rights for physicians are being challenged in Ontario. This right provides choice in health care for people who oppose patient killing.

1. Physicians need to uphold their right of conscience to refuse to participate in any way, if euthanasia or assisted suicide is legalized.

2. Physicians must maintain their right of conscience to refuse to participate in any way, if euthanasia or assisted suicide (murder) is legalized.

3. Neither my husband nor I would feel safe if our physician whom we have had for over thirty-five years, would participate in "euthanasia" or "assisted suicide". The euthanasia debate is not
about whether people have the "right to die". The debate is about whether doctors should have the "right" to lethally inject people. Currently, no one has the right to cause death of another person.

Once the abyss of taking the prescribed drugs is crossed, there can be no turning back on seeking effective treatment.

The term euthanasia is an euphemism for 'mercy' or 'killing' just as abortion is "killing" the unborn baby - no "fetus" (euphemism).

Hitler used euphemism to kill the elderly or physically and/or mentally disabled in nursing homes in Germany. He termed them as "useless eats" thus making the public feel less guilty for killing them.

The Jewish people whom he detected were called "non-human" and convinced many people in Germany and other countries in Europe to assist in sending as many as possible to death camps - six million or more.

What is the future for Canada and its citizens in our home - native land?
Who has given you or the Supreme Court of Canada the right to decide who should live and who should die?

This "slippery slope" as the pro-life movement predicted has already begun. No one's life will be safe any more, not even yours - if you should become a "burden on society" through illness, accident, dementia or Alzheimer's disease.
